

Major Project - Divine Application

```
myShow = new Slideshow('major_slideshow', {width: 358, height: 179, hu: 'images/stories/slideshow/', images:
['major1_smallthumb.jpg', 'major3_smallthumb.jpg', 'major4_smallthumb.jpg', 'major5_smallthumb.jpg'], duration: [2000,
3000], type: 'fade', pan: '10', zoom: '10', resize: false});
```

God tries to get a job on Earth, but quickly discovers it's not as easy as it sounds - even for someone of his talents...

Eight months in the making, this project is my final animation from Bournemouth University. I chose to focus on character creation and animation for this project, trying to create entertaining characters with genuine personality. Along the way I had to tackle challenges such as rigging for dynamics, oceans, cloth, northern lights and (hardest of all) almost 3 minutes of character animation. I learnt a lot from it, and I hope you enjoy it.
